**ELAN Network Coordinator &
Co-organiser**

This project is funded by The European Union

A space to progress in sustainable local management, exchange successful experiences, as well as address the challenges that the cities that have had a vertiginous development assume, with the goal of developing proposals to return more efficient urban centres.

It will involve the participation of Peruvian and European institutions, with the aim to promote the generation of potential technological-based business opportunities. It will be an opportunity for advance technological sectors, such as Renewable Energies, TIC and Environmental Technologies.

In cooperation with

With the support of

Attendees from Latin America and Europe:

Companies (especially SMEs), Regional and Local governments, Technological Centres, Universities, Research Institutes, Cluster, Business Support Organisations, etc.

Prioritised areas of the Local Management Agenda

Sustainable construction, Regional and urban planning, Mobility/Transport, Environmental quality (Air, Soil, Water) and urban and industrial waste, Water resources, Energy efficiency, Green areas/Urban biodiversity, Information and communication technologies.

Objectives

- Identify the challenges and challenges to develop efficient urban centers, livable and sustainable, in benefit of the residents and the environment.
- Promote the creation of networks between the assistants to the event, encouraging the technological development and the creation of strategic alliances.
- Create a space of exchanging successful experiences that promote real business around sustainable and efficient efforts from the cities.
- Promote the generation of technology-based business opportunities in areas related to the development of sustainable cities.
